

Hi there,

I promised you that I will show you how to manifest more money in 5 simple steps.

But before I get into the specific steps, know this...

It is a reality that most of the world need money to survive. Although everyone uses and need money, not everyone has a healthy view about it. Many religions teach that money is the “root of all evil”. They hold on to clichés such as “the rich are getting richer while the poor are getting poorer”.

If you want more money in your life, then you’ve got to induce a positive pattern towards it — if you love money, just admit it. There’s nothing wrong in attracting wealth, if you do it the right way.

Attracting money into your life is much like a relationship. If you want to attract that sexy woman or that handsome guy into your life, then you call them on the phone. You meet together on a dinner date. Sounds pretty simple, right?

Perhaps you write love letters or sweet poems.

You find out what the person likes and make a little surprise gift.

You keep a picture of that person in your wallet.

You are in love. This is basically what manifesting money is about. It’s not just saying or writing affirmations. It’s not just using pictures to visualize things. It’s **putting your whole heart, soul and mind into it through the utilization of patterns.**

With money, it has to be the same way. So, here are 5 steps:

1. **Realize money is like electricity.** In and of itself, it is not good or evil. Much like electricity, you can use it to do a lot of good or cause a lot of unhappiness. Many people blame money for their mistakes and are afraid to face responsibility for their own life.
2. **Everything that you want to manifest requires a specific spirituality accordingly.** Spirituality is an intense feeling for something. It is a healthy and balanced love for something. If you are afraid to love money, how can you ever expect it to want to come to you? Remember, this is a healthy and balanced love — start loving money in a healthy manner and it will come to you.
3. **Keep pictures or symbols of money to help you focus and remind you of your intention.** You can use pictures of money, real money, or symbols such as rocks or marbles. Use whatever works best for you.

4. **Take action.** Don't just take an action for action's sake, but meditate and think it through. Trust your subconsciousness to lead you to do the right action, but nonetheless don't expect things to just fall out of the sky into your lap.

5. **Imagine yourself wealthy.** Use your imagination of what you would feel like if you were wealthy. Make it a routine. A pattern. Exactly how much money would you like to have? When? Etch these thoughts into your mind and then work with the feeling of already having it now. I recommend this should be done on a daily basis for at least half an hour, but again, do what works best for you. Remember that you want to do this regularly and you want this to be fun, not a chore.

These 5 steps, when followed, will progressively take you to the next level financially. They have worked for me and I trust that they will do the same for you too.

With Love,
